STATISTICS

According to MDA Training “5 Workplace Leadership Statistics You Shouldn’t Ignore.” MDA Training, 12 Feb. 2020, mdatraining.com/blog/workplace-leadership-statistics/.

- Employees who are supervised by highly engaged LEADERSHIP teams are 39% more likely to be engaged themselves.
- 32% of employees lack the confidence to put new ideas to employers
- 58% of Managers report that they never received any management training
- 82% of employees don’t trust their boss to tell the truth
- 79% of employees cite the “lack of appreciation” as a reason for quitting their job.

LEADERSHIP

a. Definition — The ability to influence others to accomplish a task by providing a purpose, a direction and appropriate motivation.

Explaining the mission to subordinates helps them keep the importance of the objective up front and allows them to perform in a more efficient and disciplined manner.

b. Leadership is not a rank, leadership is not a position, leadership is a choice. It has nothing to do with your position on the organizational chart, once you make a conscious decision to look after the person on your left and your right you have become a leader.

c. We have all heard the phrase "Leaders Lead" well do they? Leaders must set the example for all to follow. Good leaders set the standard and can meet it/surpass it. Leading by example instills confidence and respect in their leaders and in turn makes them more effective.

- e. Seek responsibility and always take responsibility for your actions, good or bad
- f. Make sound and timely decisions. A good leader makes a decision, right wrong or indifferent make a decision, indecision or no decision is wrong every time and can result in an adverse action. If the decision was the wrong one, explain the rationale behind it or what led you to the decision and learn from it.

He further states “The skill that it takes to hold your opinion and comments until everyone has spoken, allows you to do two things, 1 It gives everyone the opportunity and feeling that they have been heard and that everyone has contributed, 2 it gives you the opportunity to hear everyone else's input and feelings before you render your opinion”

3. Selfless Service — Put self-interest, personal advantage and self-gain aside and do what is best for the group/organization
4. Integrity — Be honest, upright, avoid deception and live with respectful values
 - a. Ownership — Taking ownership includes solving problems, being decisive, not placing blame, and taking responsibility for actions. Morale of subordinates can be damaged if a leader is not accountable for their own actions. - b. What is the difference between Motivation and Inspiration?
 - Motivation is an external influence or driving force
 - Inspiration is an internal influence or pulling force.
- c. As a leader we need to try and inspire those around us. If we stay motivated and positive, we should hope those around us will also choose to be motivated and in turn be motivated in a positive direction. It's a little thing, but if we try to inspire people it will feel more natural and if you try to “motivate” people it can seem fake.

VIDEO 5 — UNDERSTANDING MOTIVATION AND INSPIRATION

EPO 6: UNDERSTAND THE BASICS OF SUPERVISION AND EVALUATING WORK PERFORMANCE.

Considerations

NOTE

Show Slide “Basics of Supervision and Evaluation”

- a. Don't over supervise — These are referred to as Micro Managers. Micro Managers stifle initiative, breed resentment and lower morale for everyone. It's like the common cold, and highly contagious.
- b. Issue tasks, and let your subordinate work the task. Let the task mature, and offer feedback on current progress. Don't get stuck telling your subordinate exactly how to accomplish a task.

- c. Don't under supervise — This can lead to miscommunications, lack of confidence in the chain of command, and the perception that you as the leader do not care about the team and/or the mission
- d. Don't be afraid to delegate leadership, responsibility, and authority. This will make sure subordinates understand what goes into making decisions and have a better understanding of the end task. This also helps start building a better leader by challenging them to be successful.
- e. Ensure that all tasks are understood, supervised, and accomplished. This can be done through clear and concise instructions. These instructions should be supervised, and then feedback provided to the subordinate about performance
- f. Practice what you preach. Subordinates should want to learn from a good leader, the same is true that a bad leader can instill bad habits in good people. Perform as if everyone knows each choice you make, and will be critical of all of your decisions.
